

Structural Engineer – Development

POSITION INFORMATION

DGL is looking for a well-rounded civil/structural engineer to enhance the qualifications of our rapidly expanding Development Division. As a multi-disciplinary engineering and survey firm, success in this position will require the ability to coordinate all aspects of a project beyond the structural discipline.

- Reports to Director of Facility/Site Development
- Full-time, Exempt

PRIMARY DUTIES AND RESPONSIBILITIES

- Perform engineering calculations
- Coordinate and communicate with clients to determine project scope
- Coordinate with other engineers and architects on project requirements
- Prepare drawings and specifications in accordance with project requirements
- Review shop drawings, RFIs and respond to other construction questions

SKILL SET

- Experience in structural steel, reinforced and unreinforced concrete and in load bearing and non-load bearing masonry design
- Recent experience with building codes and structural standards/regulations
- Current experience with either STAAD, RISA 3D or RAM Elements
- Experience with AutoCAD required and experience with Revit preferred
- Must be well organized
- Professional demeanor
- Ability to communicate effectively with all types of people
- Valid Driver's License required
- Some tasks may require travel to complete. Time and mileage would be reimbursed (mileage at current Ohio Department of Transportation rates) based on current reimbursement policies.

EDUCATION

- Bachelor's Degree in Civil Engineering from an ABET accredited institution
- Able to work on a variety of project sizes.
- Engineering Intern (E.I.) Certification in progress
